

**President's address to the participants of the 10<sup>th</sup> Congress of the Association of Yugoslav Pathologist  
with international participation**

Dear colleague and friends,

The 10<sup>th</sup> Congress of the Yugoslav Pathologists was held thanks to the great enthusiasts and passionate lovers of this profession, among whom I would like to mention general-major Dr. Zoran Stankovic together with his associates from the Medical Military Academy in Belgrade and Prof. Dr. Vladimir Vit. Baltić the main editor of the journal Archive of Oncology.

Special thanks to them for organising the Congress and enabling the printing of the journal when it all seemed to be impossible to complete.

It is great pleasure to have with us, for the first time, our colleagues from the field of forensic medicine and respected guests from abroad who gave the Congress a World wide character. It is my wish, of course that we leave this Conference not only much better informed, but perhaps a little more motivated to actively participate in the work of The Society of pathology Serbia and Montenegro which is registered in the record of the Federal Miniatration of Justice in Belgrade under 3/1-931/2-2002007 dated 18.06.2002.

You will be warmly welcomed.

*Prof. Dr. Živka Eri  
President of The Association of Yugoslav Pathologists*
